ONLINE PLATFORM

CUSTOMIZABLE & SCALABLE

The **LIVING SECURITY** online security awareness training platform leverages game-based learning and custom curriculum to make cybersecurity awareness training fun and effective with the ability to scale.

LIVE ACTION VIDEO SERIES

Cinematic content crafted around team's risk areas

INTELLIGENCE-BASED CONTENT

Our content keeps pace with emerging threats

GAMIFIED LEARNING

Immersive & engaging learning method increases adoption

MICRO MODULES

Role-based and content-specific modules for a customizable program

SMART ANALYTICS

Our human risk dashboard gives greater insight for informed decision making

SCIENCE BACKED

Proven techniques motivate behavior change

SECURITY AWARENESS TRAINING BUILT TO SCALE

We offer infinitely scalable soltuons to help you teach your employees about cybersecurity, IT best practices, and even regulatory compliance. With regular training for employees, businesses can significantly reduce risk, decrease infections, reduce related help desk costs, have fewer breaches to protect their reputation, and secure their overall cybersecurity investment.
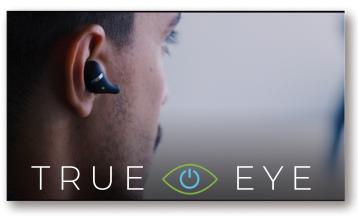

TRAINING SERIES

Join Atlas and MJ as they track the activities of Simon, an accused murderer, and his identical clone counterpart. Become a part of the story as a remote team agent as you solve puzzles, answer security questions and identify security missteps while you locate the bot and determine who the real killer is.
