

Secure Our World

A Month of Cybersecurity Awareness Starts Now

What’s Coming Up

Weeks 2–5

WEEK 2: WIZARDS & WHALES

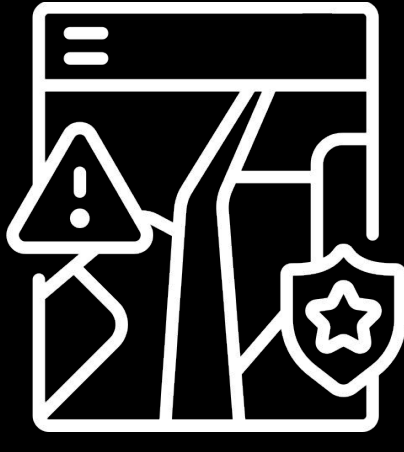

The Most Targeted People in Your Company

Overview:

Admins, engineers, executives, influencers they hold the keys to your kingdom. This week explores why attackers go after your most powerful people and how to defend them.

You’ll Learn:

- Who your “Wizards” (tech staff) and “Whales” (execs) are
- Why their access and influence make them prime targets
- Tips for interacting securely with privileged and high-profile users
- How tailored training protects your power players

WEEK 3: ZERO HOUR — CRISIS RESPONSE

Breaches Don’t Wait. Neither Should You.

Overview:

When a cyber crisis hits, seconds matter. This week drops you into the “golden hour” of a breach & trains you to think clearly under pressure because how you respond can make or break the outcome.

You’ll Learn:

- What actually happens during a breach
- The first moves that stop the bleeding
- How to communicate during chaos
- The value of realistic, scenario-based training

WEEK 4: SECURE CULTURE AMBASSADORS

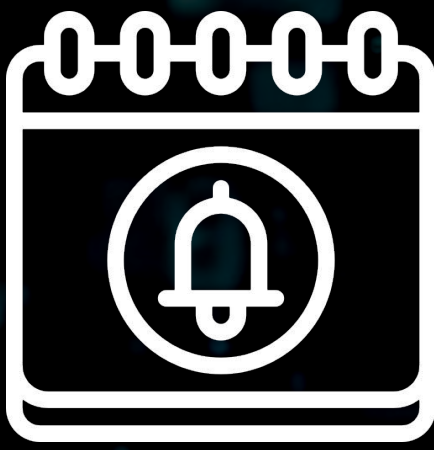

Security Starts With People

Overview:

Cybersecurity isn’t just policy it’s culture. This week shows how ambassadors across your organization can model secure behavior, amplify awareness, and shift habits from the inside out.

You’ll Learn:

- What makes a strong security culture
- How to become a security ambassador
- How to become a security ambassador
- How to inspire change peer-to-peer

WEEK 5: FROM AWARENESS TO ACTION

Make It Stick — Cybersecurity Year-Round

Overview:

Awareness Month is just the beginning. This final week connects the dots between everything you've learned: AI, privileged roles, crisis response, culture & turns it into action that lasts all year.

You’ll Learn:

- How to apply lessons across your role
- How to stay ready for evolving threats
- Where to find deeper training and communities
- How to contribute to a safer digital world
